

WHAT SETS HOME CONFINEMENT, INC. APART FROM OTHER VENDORS

Excellent Customer Service:

Our mobile service technicians will meet the defendant at the court, at their home, at their work, or another convenient location close to the defendant within two hours of enrollment. (This does not include Interlock Intoxalock Device, which must be installed at a service center)

- HCI will enroll the offender into our software and initiate contact, via text message, email, and/or telephone call, to schedule the install or the offender may contact HCI to schedule their installation appointment.
- New enrollments, service appointments, retrievals & removals are completed on daily basis.
- HCI will email or fax a Verification of Enrollment Form upon completion of installation.
- HCI notifies the Court within 24 hours if someone fails to respond to HCI for installation.
- HCI provides daily violation summaries via email by 8:00 am the next business day unless a major violation occurs or breathalyzer violation.
- HCI provides all breathalyzer violations in real time to the responsible party at the Court via email or text or both, depending on preference of the Court.
- **COMING THIS SPRING 2022** – Home Confinement Inc. on-line Portal. This portal is designed to provide user-friendly access to courts for easy on-line enrollment, and time saving capabilities to retrieve customized data for the probation department/courts. This portal also provides a separate link for defendants for account & payment information.

Our Products – Credibility Matters:

- GPS AT1 Tether (Attenti Product) – Interference Detection, LTE and Wi-Fi Communication, tracking, and data upload, Pursuit Mode Onboard Processing, Patented Strap Design, 40-hour battery (when properly charged), Trusted government provider since 1994.
- SL3 (B.I. Product) – Portable PBT Device, DART fuel cell manufacturing (same as most law enforcement) biometric facial recognition, tamper detection technology, 72-hour battery life, GPS point when test submitted, convenient compact size.
- TAD (Transdermal Alcohol Detector) Tether (B.I. Product) – Sensor Technology (mechanical electrode assembly vs fuel cell), continuous alcohol monitoring & reliable curfew monitoring, simultaneous curfew monitoring, 7-Tamper Proof Technology – STRAP, PROXIMITY, WATER, TEMPERATURE, SKIN RESISTANCE, FOREIGN MATERIAL, AND MOTION), court validated, no backup testing needed.
- INTOXALOCK INTERLOCK – Combines the functionality of an Ignition Interlock Device (IID) with the flexibility and convenience of a 24-hour alcohol monitoring program and also meets a participant's ignition interlock requirement for regaining driving privileges after an alcohol-related offense.

Our mission is to provide excellent services & products at reasonable and competitive pricing.
